EDUCATION

Kasetsart University

Bangkok, Thailand | 2023-Present

- Bachelor of Science, Computer Science Major, GPAX (Year 2): **3.95**
- Relevant course: Software Design and Development, Mobile Application Design and Development
- Member of the CNC Lab (Communications, integrated Systems and Cloud Research Laboratory), where I honed my skills in team-based software development using an Agile methodology. Gained hands-on experience with diverse tech stacks and strengthened essential skills in Git under the guidance of senior lab members, enhancing my ability to work in modern development workflows.

SKILLS

- Languages: C, C++, Python, Java, JavaScript, Shell Script, sed, awk, HTML5, CSS3, Node.js, Dart, TypeScript, SQL
- Frameworks: ReactJS, Tailwind CSS, JavaFX, Flutter, NextJS
- Tools: Git, Neovim, VS Code, IntelliJ

EXPERIENCE

T.C.C. Technology, Bangkok Thailand (Application Developer Trainee) Apr 2025 – Jun 2025

- Participated in the development of a vertical food delivery application ([SOOK](#)) for buildings such as One Bangkok and nearby areas. Responsible for implementing some app modules, including the user settings feature, using **Flutter**.
- Developed a shipping rate upload page for the Admin Backlog web project, an internal admin dashboard for monitoring logs and data from the food delivery app. The feature streamlined rate management, significantly reducing workload and improving efficiency, using **React (JavaScript/TypeScript)**, **Material UI (MUI)**, and **Redux Toolkit**.
- Gained hands-on experience working in an **Agile development** environment and enhanced understanding of Clean Architecture applied in enterprise-level software projects.

PROGRAMMING PROJECTS

Food Delivery App [<https://github.com/Rugsit/Food-Delivery-App>] Apr 2025 – Jun 2025

- Developed a mobile food delivery application using Flutter
- Implemented **Clean Architecture** to ensure scalability and maintainability
- Integrated Supabase for backend services, including database and image storage
- Designed and developed responsive mobile UI with real-time data interaction

Social media [<https://github.com/Rugsit/Social-Media-Project>] Apr 2025 – May-2025

- Developed a small-scale Social Media project with features including creating posts, building communities, and joining communities.
- Gained hands-on experience with React and TypeScript, using Redux Toolkit for state management.
- Integrated Supabase as the cloud database for data storage and implemented authentication with OAuth.

PawPocket [<https://github.com/nk-n/PawPocket>] Dec 2024 – Mar 2025

- Contributed to the development of a Flutter app for pet tracking and sharing; integrated with Firebase
- Designed UI/UX and implemented camera access and device I/O interactions

CNC Lab Recruitment [https://github.com/Rugsit/CNC_Recruit_Frontend] Dec 2024 – Feb 2025

- Contributed to the developed a responsive recruitment site using **Next.js** and **Tailwind CSS**
- Handled frontend dev, backend API integration, and UX/UI design for applicant flow

MyRequestKU [<https://github.com/Rugsit/MyRequestKU>] Aug 2024 – Oct 2024

- Contributed to the developed JavaFX desktop app with **MVC architecture** and Scene Builder for UI implement
- Designed UI/UX in Figma and integrated frontend with database for dynamic data handling
