## SUMMARY

---

Computer Science undergraduate at Kasetsart University (GPAX 3.95) with hands-on experience in full-stack and mobile application development. Skilled in React, Next.js, and Flutter, with a solid understanding of Clean Architecture and Agile methodologies. Passionate about developing software across both frontend and backend to create efficient, user-centered applications.

## EDUCATION

---

### Kasetsart University, Bangkok, Thailand 2023-Present

- Bachelor of Science, Computer Science Major, GPAX: **3.95**
- Relevant courses: Software Design and Development, Mobile Application Design and Development

## SKILLS

---

- **Technologies:** ReactJS, NextJS, Flutter, Tailwind CSS, Material-UI (MUI), Redux Toolkit, Java Spring Boot, Git, Firebase
- **Languages:** JavaScript, TypeScript, Dart, HTML5, CSS3, Java, C, C++, Python, SQL, Shell Script, Go
- **Skills:** Frontend Development, UI/UX Design Principles, Responsive Web Design, Web Applications, Mobile Application Development, Clean Architecture, Agile Methodologies, API Integration, System Design, Problem Solving, Team Collaboration

## EXPERIENCE

---

### T.C.C. Technology, Bangkok, Thailand (Application Developer Trainee) Apr 2025 – Jun 2025

- Built a shipping rate upload page for the Admin Backlog dashboard with **React, MUI, and Redux Toolkit**, improving rate management efficiency.
- Gained hands-on experience working in an **Agile development** environment and enhanced understanding of Clean Architecture applied in enterprise-level software projects.
- Contributed to the SOOK food delivery app for buildings like One Bangkok, implementing user settings and other modules using **Flutter**.

## PROGRAMMING PROJECTS

---

### Transport Management System for Gas [<https://github.com/nk-n/TMSG-Transport-Management-System-for-Gas.git>] Jun. 2025 – Sep. 2025

- Contributed to the development of PTG Logistic's gas transportation management system, featuring task distribution, order tracking, delay notifications, driver compensation calculation, customer billing, and transport performance reporting. The system significantly reduced delivery delay tracking time and improved operational efficiency.
- Developed both frontend (**Next.js**) and backend (**Java Spring Boot**) for the dispatcher web application.

### Laboratory Equipment Management System [<https://github.com/Rugsit/Laboratory-Equipment-Management-System-Frontend.git>] Jun. 2025 – Sep. 2025

- Developed features for a Laboratory Equipment Management System that improved asset tracking, reduced lost items, and streamlined maintenance requests and item requisition for lab operations.
- Responsible for building equipment borrowing/returning workflow and inventory management (add/remove items) for both frontend (**Next.js**) and backend (**Go**).

### PawPocket [<https://github.com/nk-n/PawPocket>] Dec. 2024 – Mar. 2025

- Developed a comprehensive mobile application to support pet care (dogs and cats), featuring modules for record keeping, treatment tracking, story logging, pet housing search, and activity scheduling.
- Contributed to the development of a **Flutter** app for pet tracking and sharing as part of a 2-person team, with **Firebase** integration.
- Designed UI/UX and implemented camera access and device I/O interactions for an intuitive user experience.
